Face and Neck - (Save R1080)	R5100
Face, Neck and Chest - (Save R1065)	R6035

TARGETED PEELS

BLEMIDERM TREATMENT POR

A professional treatment for acne-prone, congested skin. It combines a targeted chemical peel and corrective mask to unclog pores, control oil, reduce breakouts, and improve skin clarity.

Protocol: 3 treatments, 21 days apart, for optimal results.

COSMELAN IN-CLINIC MASK POR

The Cosmelan® in-clinic treatment is an intensive depigmentation programme designed to visibly reduce pigmentation, melasma and uneven skin tone. Developed by mesoestetic, this professional treatment works by inhibiting excess melanin production at its source.

The in-clinic phase includes the application of a powerful corrective mask to initiate the skin's renewal process, followed by a structured homecare protocol to maximise and maintain results. Ideal for clients struggling with stubborn pigmentation, this treatment promotes a brighter, clearer and more even complexion.
